- c. Economic development, including the enterprise growth,
- d. Culture, art, saving the cultural and traditional demesne
- e. Study, education and upbringing;
- f. Heritage tourism and recreation of children and youths,
- g. Activities in support of disabled people,
- h. Promoting employment and occupational elicitation of jobless people and at risk from redundancy,
- i. Diffusion and women rights protection and activities in support of the equal rights of men and women,
- j. Activities in support of European integration and developing contacts and cooperation between the societies,
- k. Promoting and organizing volunteer work

The Fund can, for the goal realization described in § 5, leading the unpaid activity of the following object (according to the Polish Activity Classification):

- a. PKD 74.14.A advising and direct help for non-government organizations, physical people and corporations and organizational items which do not have juridical personality in the field of preparing subsidies applications and project management (planning, running, controlling and evaluating, reporting),
- b. PKD 91.33.Z technical and financial aiding of domestic and foreign non-government organizations, physical people and corporations and organizational items which do not have juridical personality,
- c. PKD 91.33.Z cooperation with other entities which have the similar profile of working.

The Partnership Fund do not lead trade.

The Partnership Fund reinforce the activities in support of well-balanced development animated by non-government organizations and local societies through the realization of small grant competitions, the help with trainings, counseling and information.

The Fund activities:

- ❖ Stimulate the activity of local communities
- ❖ Support small, the rank-and-file initiatives of the organizations which do not have any experience or financial capacity
- ❖ Ensure complex advisory on its merits and technical banking at every stage of the donating process
- ❖ Make the verified models common and proposes the solutions which had not been used before
- ❖ Allow to adjust the grant programs for the local society needs

Are based on clear and friendly procedures

Provide high quality, effectiveness and constant improvement of support implements

II. The report of the statute activities led in 2009

In 2009 the Partnership Fund (PF) continued the developing of the grant-giving activities which aim is to encourage local initiatives in support of well-balanced development. The small subsidies programs, directed to small, local non-government organizations and informal groups, help committing citizens and local societies to the functional activity in support of the well-balanced development. The Fund leads the role of “the first category benefactor” for the new initiatives and local NGO, especially advocacy engaging the population on the local level. The distinguishable characteristic of the PF grant-giving activities is expedience – it is based on keeping the contacts on the grant-donor – beneficiary level. It assures also additional technical support and trainings which are aimed at strengthening the institutional capabilities and abilities of the beneficiary.

In 2009, the Fund, supporting the small and local organizations, accepted and evaluated 112 applications for subsidies and granted inclusive of 74, in total 559 359 PLN including 3 programs:

- „Kropla Beskidu Fund” (financed by the companies of Coca-Cola system: Coca Cola Services Poland and Coca Cola Hellenic Poland) focused on the backing for rank-and-file initiatives in Sadecki Beskid in Malopolska in support of water preservation;
- Schools for Eco-development; Let's Care for Our Common Space (financed by such companies as: Toyota and Cadbury and The National Fund for Environmental Protection and Water Management by The Partnership for the Environment Foundation) focused on backing school initiatives in support of well-balanced development, engaging the societies;
- “Advocacy and campaigns in support of preservation” (financed by C.S. Mott Foundation) concentrated on the support rank-and-file initiatives of advocating and campaigns.

“Advocacy and campaigns in support of preservation”

The program has been realized since 2007 as the subsidiary coming from the C.S. Mott Foundation resources. It is addressed to the non-government organizations from Poland, especially from the provinces such as: malopolskie, slaskie, podkarpackie and swietokrzyskie as well as non-government organizations taking part in transboundary or supranational activities.

The aim of the program is to finance ecologic initiatives and civic projects in support of increasing the participation of local communities in shaping the policy of preservation and well-balanced development in Poland.

In the Program such activities can be financed as:

- law and pro-ecologic policy monitoring and consultation,
- compilation and promotion of alternative policy in the field of preservation and balanced development,
- preparing and introducing the positions in the range of preservation,
- the social control of programs and projects financed by European Union and connected with the realization of ecologic policy of the European Union,
- engaging the local communities in shaping the ecologic policy on the local, regional, internal and international level,
- the development of the abilities of non-government organizations for interaction in support of shaping the expansion programs on communal, provincial and domestic level.

Kropla Beskidu Fund program is a program which aim is to support civic initiatives in support of respecting the water heritage of Beskidy financially and organizationally and four communities of nowosadecki district are within its range: Krynica, Muszyna, Piwniczna Zdrój and Rytro. This initiative is signed in the process of implementation Water Frame Directive which major goal is the achieving and keeping the water environment sound.

Kropla Beskidu Fund, except from ecologic education and promoting the preservation of water resources, sets out to include to these activities of Beskid Sadecki societies, promoting the ideas of the local communities cooperation to build the conscious and active society in this way. It is very important that the citizens should lead these actions with local authorities, private companies and non-government organizations' cooperation.

Water is very precious resource for Beskidy. The famous health resorts are the credit for this region, health resort visitors have been using the therapeutic features of the water springs. Water is also bottled in numerous workshops, e.g. in Tylicz, as mineral and spring water. No wonder that the issue of the effective preservation of ground springs and water areas are treated very seriously in Beskidy. This preservation is also important in view of unusual natural virtues of water in Beskidy and their great importance for tourism development. Kropla Beskidu Fund reinforces this preservation as well.

In 2009 a new formula of the program was elaborated. In 2009 it was a priority to support domesticated, practical activities taken up by the local communities which are contributory to the visible improvement of the water environment of the region.

While the grant competition, two forms of subsidies were distinguished:

- I extent subsidies (amounts up to 5000 zł) are destined for the non-government organizations, schools and other entities for the practical educational activities which contribute to the recovery of the water state.
- II extent subsidies (amounts up to 25 000 zł) are destined for the non-government organizations, schools and other entities for the realization of the undertakings which bring the measured effects in a form of the recovery of Beskid Sadecki water state.

The following are the constitution of the Program Counsel which decides about the ways of the development of the Kropla Beskidu Fund and adjudicates the grants competition:

- The Partnership Fund;
- Coca Cola system companies: *Coca Cola Hellenic Poland, Coca Cola Poland Services;*
- Poprad Landscape Park (*Zespół Parków Krajobrazowych woj. Małopolskiego*);
- The Regional Water Management in Krakow;
- The Institute of Meteorology and Water Management in Krakow;
- Communities: Krynica Zdrój, Muszyna, Rytro, Piwniczna Zdrój
- The Regional Management of Preservation, department in Nowy Sacz,
- District County in Nowy Sacz
- Partnership for the Environment Foundation,

As preparing the beneficiaries for taking part in a competition, the Fund organized a training with the participation of the experts in Muszyna in 3 April 2009 entitled “Preservation of water heritage of Beskid Sadecki – examples and operation possibilities”. Except from recognizing the new formula of the program, the representatives of the organization had an opportunity for participating in three expert theme modules:

- *"The restoration of natural merits of river valleys".*
- *"Mineral waters of Sadecczyzna, the examples of realization projects possibilities"*
- *"The elements of the active preservation of nature concerned in water environment"*
- *"The rules of participation in the subsidies competition"*

In 2009 ten projects were realized, including: diagnosis of threats and the improvement of the breeding ground of stream trout and grayling in Bradowiec stream in Tylicz; reconstruction of the historic St. Kinga's mineral water pump room; making the water intake of mineral water in Piwniczna; managing the catchments of Żegiestowski Stream; the reconstruction of an old water mill and antique after-lemkos bridge; creating ecologic complex near the primary school in Rytro; the prevention of the reproduction place of salamander and list the streams of mineral water in Lomnica Zdroj; the provision of mineral water stream Wapienne in Muszyna and conducting the cycle of trainings connected with ecologic education for the students and inhabitants of Czyrna village.

Slotwiny Estate"

In October 2009, the Partnership Fund organized a country visit for the representatives of Program Counsel which aim was to present chosen initiatives of Kropla Beskidu Fund realized in the previous years. The Counsel visited four places of project realizations and met with their executers:

- Primary School no 1 in Krynica-Zdroj, project *„Slotwiny Zdroj – the reproduction of the spa tradition of*

- Klucz Muszynski Association, project *„Marking and accessing of the nature memorial Czarna Mlaka Pond in Powroznik"*

- Primary School in Rytro, project *„Accessing the terrain on the bank of the Roztoczanka and creating a Greek Class"*

- Women's Association in Support of Mlodow Village Development, project *"Saving, arraying and popularizing the historic springs of St. Kinga's mineral water in Glebokiem"*.

Schools for Eco-development Program

In 2009 The Partnership Fund functioned as an operator of subsidy component of Schools for the Eco-development program realized by The Partnership for the Environment Foundation. The Fund was responsible for the process of granting and clearing up the subsidies and also supporting the beneficiaries while contesting and clearing up the subsidies. During the project, 89 applications had been evaluated among which the Subsidy Committee granted 54 subsidies for the sum of 292 545 PLN. The funds for this goal came from The National Fund for Environmental Protection and Water Management and such companies as Cadbury Poland, Toyota Fund for Europe, Toyota Motor Poland, Toyota Motor Manufacturing Poland, Toyota Motor Industries Poland and were passed to The Fund by the Partnership Foundation for the Environment.

The priority for 2009 were the actions connected with the energy saving and biodiversity and building the chain of the Schools for Eco-development cooperating with themselves in regions and developing as the centers promoting good ecological solutions which assign the quality of workings in support of well-balanced development and reach for the domestic and international quality certificates in the range of environment management: the titles of domestic Local Center of Ecological Activity and international distinction of "Green Flag".

The functional initiatives realized in the public space which contribute to the improvement of given area, could have been the subject of the competition. It could have also been energetic modernizations in a school building, modernizations which affect the water usage reduction, the organization of recycling system or, for example, the modernization of green open space which would be available for the citizens after the renovation, old parks renovation, building bicycle and educational paths etc., adapting the cultural and natural heritage buildings for the local society needs, and others.

Program was realized in such regions as: Walbrzych, Kamienna Gora, Olawa, Legnica, Brzeg, Mazowsze, Malopolska, Warmia and Mazury.

Institutional development

The Partnership Fund arrived at series of actions aimed at institutional development and making its actions more professional realizing, thanks to The National Fund for Environmental Protection and Water Management, two projects:

- „The increasing of fundraising activities of the Fund of Partnership (2008-9)”
 - „Making PR more professional and the Partnership Fund promotion purposing the strengthening the local ecological initiatives” (2009-10)

In this way, The Partnership Fund began the process of building its own identity (to the end of 2008, the Partnership Fund used to be an isolated unit of its founder – the Partnership for the Environment Foundation and was an element of its strategy). During the preparations of taken actions and implementations of the strategy of gaining new donors and the external communication was started. It is an important process relevant to the assertion of financial stability and building a strong image of the Partnership Fund as independent and stable grant-giving organization.

Endowment Building

The Partnership Fund, for assuring the financial stability in the future and funds for the realization of statutory goals since 2005, is building the endowment capital which scale was - to the date of 31 December 2009 – 852 136,93 PLN.

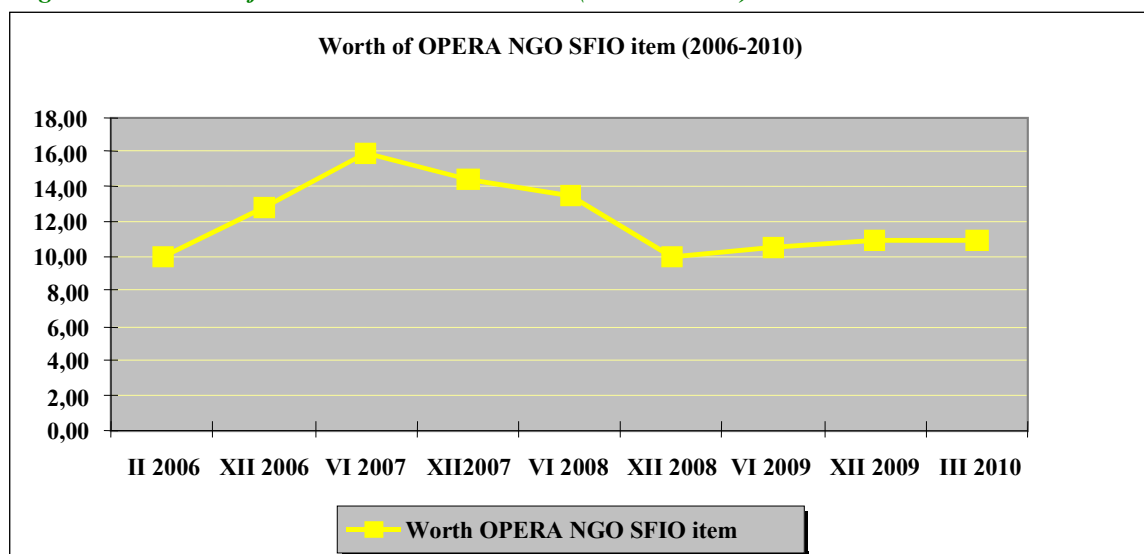

Nowadays donors and the sources of its origin are: Stefan Batory Foundation, C.S. Mott Foundation, the Partnership for the Environment Foundation, the Partnership Fund and profits from the capital investment in the form of bank investments.

So far, the Fund had invested resources on bank accounts and on the Technical Investment Fund OPERA NGO SFIO. Purchasing the units of participation is a long term investment. It is assumed that in the further future, the situation on the global markets will get better, the crisis will pass by and the investment will fetch profits. To the date of 31 December 2009, the change of the participation unit got +10,04% since the beginning of the year (*in comparison, at the end of 2008 it was -31,14%*), whereas the valuation loss was 89 710 PLN.

Diagram no 1. Rate of return net since the day of registration OPERA

Diagram no 2. Value of item attendance in 2006–10 (on 23.03.2010)

III. The list of given subsidies in 2009, according to the programs.

Total summing-up:

Number of given subsidies:	74
Value of given subsidies:	559 359 PLN
Value of other subsidies:	1 230 151 PLN
All-in value of supported projects:	1 789 510 PLN

Summing-up the granting programs:

Donation program	The number of donations	The value of given subsidies (PLN)
Advocacy and campaigns for environment preservation	7	135 943 PLN
Schools for Eco-Development	54	292 545 PLN
Kropla Beskidu Fund	13	130 871 PLN
Total	74	559 359 PLN

Schools for Eco-Development Program:

PG - 13321

School and Kindergarden Complex no 1 in Walbrzych (Walbrzych, dolnoslaskie province)

Drop to drop
(4 000 PLN)

The school has a problem of old student toilets which have not been modernized since the beginnings of the school. The organizers were determined to achieve two goals: to acquire the Certificate of Local Center of Ecologic Activeness and reduce the water usage in the School and in households. Informative action for the occupants (conference, leaflets) and actions engaging students – educational activities, water balance, creating the School Water Deputation, etc.

PG - 13322

Public Primary School no 30 by name of Armia Krajowa in Walbrzych (Walbrzych, dolnoslaskie province)

Eco-Spa
(3 500 PLN)

The aim of the project is to pervade the pro-ecologic consciousness among the students and occupants of the district through creating educating, recreating and healthily path. During the preparations a survey concerning the consciousness of caring about the environment has been conducted among the local society. The aim of the project is to broaden the pro-ecological awareness of students and citizens of the district through creating the educational, recreational and curative path. Organizers also plan to improve the quality of the environment through cleaning and enhancing it with seedlings. Moreover, the students and inhabitants will be involved in such educational action as happening or Eco-Spa coat of arms competition

PG - 13323

ZHP Dolnoslaska Flag of Walbrzyski Land Regiment (Walbrzych, dolnoslaskie province)

"Eco scout" that is to say the ecologic skirmish in the wake of scouting in Walbrzych
(5 000 PLN)

To improve the low ecological consciousness among the members of the organization, they will have an opportunity to take part in the series of activities actively – classes, happenings, Olympic Games, programs, etc. In addition to that, scout hut will be renovated – the future headquarters of Scouts Center of Ecologic Activeness and a natural and historic path “Green Trail of Scouting in Walbrzych”. Additionally, the scouts will be promoting ecological postures in publications of different types.

PG - 13324

The Primary School in Czarny Bor (Czarny Bor, dolnoslaskie province)

[Czarnoborski forest bustles that it is time for saving](#)

(3 000 PLN)

Originators would like to make the local society more active in energy saving, water and recycling. To do this, the students will take part in Science Festival, competitions and observation of water and energy usage in house and at school systematically. Parents will get investigative cards of energy and water usage; the citizens will be informed about the ways of saving by means of leaflets and put up boards. Originators would like to activate local community for energy and water saving and recycling rubbish.

PG - 13325

Public Primary School by name of Janusz Korczak in Jugowice (Jugowice, dolnoslaskie province)

[Collecting Zlotys we save lightbulbs](#)

(2 000 PLN)

The aim of the project is to grow the electric energy saving awareness of students, workers of the school and the local society and to indicate the practical ways of energy saving which can be used by every person. An informative and promotion action will be conducted among the citizens; the students and school workers will be implemented in actions which save energy in the school. Moreover, ecological competitions will be foreseen for the youngest entrants.

PG - 13326

Primary School no 1 by name of Ks. J. Twardowski in Kamienna Gora (Kamienna Gora, Dolnoslaskie province)

[The Green Treasure of Rzepior](#)

(5 000 PLN)

Thanks to the realization of the project, the school will gain green terrain on which conducting lessons will be possible. Moreover, the students will take part in nature and woodland lessons, conducted by the specialists, competitions and exhibitions, whereas the adults will be able to support the operations of the project during the IV Family Fête.

PG - 13327

School and Kindergarden Complex by name of J. Korczak in Sokolowsko (Sokolowsko, dolnoslaskie province)

[Always and Forever Energy](#)

(2 000 PLN)

The realization of the project will be started by the teachers who are going to take part in theme workshops and lectures. The analysis of the current energy and coal consumption will be made, the movie about the actual status of the school will be created. Thanks to these introductory actions it will be possible to change the pro-ecologic attitude of the competitors – mostly through their participation in informative and educational action: “How to save the energy at school, house and work”, or to acquaint with the adaptation of the school building to the energy saving.

PG - 13328

The Association in support of Chelmsk Slaski Development “Silesian Weavers” (Chelmsko Slaskie, dolnoslaskie province)

[From “the gum” to “the nature”. From the computer to the self-reinforcement](#)

(5 500 PLN)

The aim of the project is to create the facilities for children and youths for safe and active resting through the modern and ecologic racecourse while the rising children's, youths' and adult's consciousness of the negative influence of computers and TV on young human development. Now, on the place of project realization, there is an old racecourse built from over 20 years old tires which, in the current condition, are dangerous for youths.

PG - 13329

Primary School in Witkow (Czarny Bor, dolnoslaskie province)

Eco-museum around the Trojgarb

(4 000 PLN)

Conceivers plan to integrate the amid communal environment in support of ecologic actions "on my own yard" through creating a place which will be the center of ecologic activeness and will attract tourists. To create this, an informative campaign, ecologic competitions, trips and a fête will be undertaken. The Eco-Museum Hall will be created as well.

PG - 13330

Public Primary School by name of Jan Kochanowski no 15 in Walbrzych (Walbrzych, dolnoslaskie province)

The sculptures of Walbrzych scattered among the trees

(4 000 PLN)

The aim of the project is to stimulate the students and citizens of Walbrzych to visit the Sculpture Gallery on Location hidden among parks and greenery. The increase of ecological consciousness among the citizens of Piaskowa Gora. Creating "The Garden of Walbrzych's Trees".

The goal of the project is to promote the Gallery and urban parks as artistic and tourist attraction of Walbrzych among the citizens and tourists.

PG - 13331

Impublic Complex of Special Schools in Szczawno Zdroj (Szczawno Zdroj, dolnoslaskie province)

The diversity of space is the more greenery

(2 000 PLN)

The aim of the project is to increase the space bio-diversity around the school in a way that it will be possible to take the advantage of spa's virtues. The project involves also recycling. The improvement of the space in which we live and work.

Project foresees the cooperation with the creators of Web sites about Szczawno Zdroj and the classification of nature memorials.

PG - 13332

The Complex of Schools in Minkowice Olawskie (Minkowice Olawskie, woj. dolnoslaskie)

Saving the energy is a good piece of advice

(5 000 PLN)

The main goal of the project is to increase the consciousness of students, their parents and school workers in the range of the necessity of saving the electric energy usage. The indication of the practical ways of saving the energy which can be used by every person.

Undertaking the activities stimulating the social activity through the march of students across the village with banners on which there will be written slogans prompting to save energy. Program predicts a competition for the villagers.

PG - 13333

The Primary School in Chwalibozyce (Olawa, dolnoslaskie province)

We save energy and have warmth

(5 981 PLN)

The primary goal of the project is to raise the awareness of students, their parents, the school workers and local society of the energy usage restriction necessity. Showing to as many people as possible that they can save energy everywhere: at home, school, on holidays, doing the homework or spending free time.

PG - 13334**Public Primary School by name of Jan Kochanowski in Wojcice (Jelcz-Laskowice, dolnoslaskie province)***Drop to drop...*

(2 019 PLN)

The aim of the project is to exchange the sanitation fittings in school and kindergarten's bathrooms and boys' and girls' toilets. The ecologic campaign among the children and youths and the citizens of Wojcice and Biskupice Olawskie called "A drop of clean water". Promoting our actions. Establishing the habit of saving the water among our students and citizens of the villages. Conducting the monitoring of school's influence on the environment (calculator of the eco-school).

PG - 13335**The Primary School no 1 by name of Boleslaw Chrobry in Olawa (Olawa, dolnoslaskie province)***Crystal Clear (As light as the sun)*

(6 000 PLN)

The aim of the project is mainly to reduce the usage of energy through replacing the lighting in 12 classrooms /in five classrooms it has already been exchanged/ what, as a consequence, should influence the improvement of the environment and to decrease the bills for electricity of the school. Showing the practical ways of saving the energy possible to use in every household. Modernizing the school so that the usage of the energy would be lower.

PG - 13336**The Complex of Over Junior High School by name of Jan Kasprowicz in Jelcz-Laskowice (Jelcz-Laskowice, dolnoslaskie province)***We save the energy – reduce global warming*

(6 000 PLN)

The goal of the project is to make students, their families and local society realize: the problems connected with storing used light bulbs and electric/electronic equipment, the necessity of energy saving, our influence on climate. Additionally we would like to purchase and exchange energy-saving light bulbs.

PG - 13337**Public Gymnasium no 1 in Jelcz-Laskowice (Jelcz-Laskowice, dolnoslaskie province)***Park Stories*

(5 000 PLN)

The aim of the „Park Stories” project is shaping the ecologic consciousness of the students and motivating them to take up an action in support of local environment, to engaging them in public issues, to take the responsibility for the nearest environment, park and the improvement of its image.

PG - 13338**The Complex of Mechanical Schools in Nysa (Nysa, opolskie province)***Saving the electricity – it is necessity, not a whim*

(5 000 PLN)

The aim of the project is to modernize existing lightening through changing it into modern, more economic and energy-saving one, while keeping the appropriate hygienic conditions of students and teachers' optical work (according to PN-EN: 12464-1:2004) and changing the approach of students and school workers towards electricity saving.

PG - 13339**Public Primary School by name of Gustaw Morcinek in Gnojna (Grodkow, opolskie province)***Living in unison with nature – you will not be poor*

(4 000 PLN)

The goal of the project is to create a didactic, relaxing and leisure playground in a school park. Land development plan (renovation of an old park) – planting trees. Activating the community of the students, parents, teachers and local society through creating educational path which will be the place of integration of school and local societies in their free time (74 students, circa 1000 citizens of the villages and nearby towns). Increasing the activeness of physical education, nature and art lessons. Waste management.

PG - 13340

Complex of Vocational Schools no 1 in Brzeg (Brzeg, opolskie province)

Eco-aware

(5 000 PLN)

The main goal is to decrease the electric energy usage through exchanging an old lightening in classrooms and halls to new, energy saving ones (some classes have already had such a lightening). We would like to educate ecologically our youths and creating them advantageous conditions for study and rest. That is why we would like to build educational ecology-theme path to acute the local communities on environment problems and to adapt old school gardens for “greenery beauty spot”, the place for relaxing and resting. After the renovation it will be available for Brzeg citizens.

PG - 13341

Public Kindergaten no 4 in Brzeg (Brzeg, opolskie province)

"Trailing the unique specimens of Brzeg's flora

(2 000 PLN)

The aim of the project is to create mini guide with the exact description and photos of trees and a map assigning the track. Propagation the brochures in nearby kindergartens and primary schools. Encouraging teachers to include a walk trailing in educational process. Activating children's, parents' and teachers' community for creating a brochure and signing first two trees situated on kindergarten terrain (100-year-old Yew and Sycamore – nature memorial) and in further sequence the rest of trees in nearby parks to complement the trail. Creating ecologic mini-trail „Zielono mi” on the kindergarten terrain for children, which is connected to the health path that will vary attractiveness of outdoors exercises. The aim of the project is to create a mini-guide with the exact description and photography of trees and a map and mark out the trail.

PG - 13342

Complex of Special Schools by the Special School-Educational Center in Grodkow (Grodkow, opolskie province)

Closer to the nature – that is to say touch, look, listen, smell and you'll understand!

(5 000 PLN)

The aim of the project is to create “A Summer-house of Nature”, that is to say the place of educational classes for disabled children and youths. Executers of the project would like to enhance and embroider the terrain near the school.

Activating the students during the project realization and shaping educational posture in them – the responsibility for created place, for saving the environment – this is an idea which is also important for the originator.

PG - 13343

Public Kindergarten no 6 named by Jan Brzechwa in Brzeg (Brzeg, opolskie province)

Preeschooler and a bird are on easy terms

(4 000 PLN)

The goal of the project is to create an educational path promoting the recognition of birds' life through kindergarten children and local community kids. Integration the citizens from the nearby surrounding with our place. Broaden the ecological awareness over birds nesting in our place. Attracting birds for the kindergarten garden through setting nest boxes.

PG - 13344

Public Kindergarten no 10 in Brzeg (Brzeg, opolskie province)

With ecology we go into better world

(5 000 PLN)

The aim of the project is to create a land of fun, meteorology and greenery in the first step of developing the kindergarten garden what will definitely solve the problem, help and glamorize the educational and developing process of children, and parents and citizens will encourage to further actions in favor of the nearest environment. Common aim will significantly activate and integrate the children, the kindergarten's staff, parents, local society and companies. Originators would like to raise the level of ecological knowledge and awareness of the society through the cycle of articles in a newspaper, web sites, to show the existing ecologic problems and encourage to take care for the environment.

PG - 13345

Communal Kindergarten in Gromadka (Gromadka, dolnoslaskie province)

Let's create green kindergarten

(4 830 PLN)

The primary goal of the project is to awaken the youngest village citizens to respect the energy and take the action serving the economizing it and shaping the appropriate attitude towards the surrounding environment. Realizing the project will start from the family picnic named „Today we save energy – tomorrow we have healthy environment”. It will be created special local committee which will be watching over the realization of the individual actions and support their realization.

PG – 13346

Primary School by name of Henryk Sienkiewicz in Siedlce (Lubin, dolnoslaskie province)

Green Gateways to the Future

(3 000 PLN)

The aim of the project is to raise the ecologic awareness of children, parents and village citizens. Creating the Green Class for leading lessons outside. Activating local and school communities for taking up activities in favor of the nearest environment. Conducting natural and ecological education through practical activities in Greek Class, the nearest neighborhood of students and the citizens of the nearby towns. Popularizing recycling, saving chestnuts, clearing the world and willful rubbish dump liquidation actions among the citizens

PG - 13347

The Complex of Comprehensive Schools in Jawor (Jawor, dolnoslaskie province)

Natural and Cultural ...

(5 190 PLN)

Rising the ecological awareness of Jawor citizens concerning the natural and cultural advantages of the town and region. Cooperation and engaging the school and local society and local authorities in the actions in favor of environmental and regional education. Creating habits of caring andthe terrain around the school among the students and citizens. Rising the effectiveness of environmental and regional education through creating a green class and botanic garden. Promoting the cultural advantages among the students, Jawor citizens and tourists through creating information boards about the relics.

PG - 13348

Communal Cultural Centre in Paszowice (Paszowice, dolnodlaskie province)

Orchid Hill

(5 480 PLN)

The aim of the project is to mark an educational path “Trailing the Three Gorges” out around the town Nowa Wies Wielka, 10 km long, leading through the most precious naturally terrains – ravines such as Lipa, Siedmica and Nowowiejski and Orchid Hill, with the exploitation of the existing tourist trails (Kopacze trail – blue and Valley of Mala Nysa trail – green). In the center of the town, next to the rural common-room (where there are trails crossing), there will be a place of tourist and citizens resting and mini „Tourist Information Point”, equipped not only in information boards, folders, photography exhibition and drawings but also in... young “guides” around the nearest area, that is to say children and youths – the town citizens – who will have some exact knowledge on the cultural, natural and landscape advantages of their neighborhood.

PG - 13349

The Complex of schools in Wojcieszow (Wojcieszow, dolnoslaskie province)

Green beauty spots

(5 300 PLN)
